

SPANISH LAKE BLACKSMITH SHOP

Your One-Stop Shop for the Best Rasps

SHOP ONLINE AT SPANISHLAKE.COM/RASPS

BELLOTA CLASSIC

Features an aggressive rasp side with the file side smooth enough for finishing the outer wall for show horses. The Classic has an extra smooth file side, which is ideal for a smooth finish when dressing the hoof.

BELLOTA TOP SHARP

Features a very aggressive rasp cut for quick removal of hoof material in all conditions, wet or dry. The file side has an intermediate cut for an excellent and efficient finish to the hoof wall.

BELLOTA TOP LEVEL

Features an aggressive cut on the rasp side, which gives an easy cut for trimming. The file side has an intermediate cut similar to the Top Sharp.

BELLOTA PRIME LEVEL

Features an aggressive rasp cut similar to the Top Level for easy rasping of the hoof. The file side has a chip breaker that allows you to cut more aggressively while still leaving a smooth finish on the hoof wall.

BELLOTA RAZOR PLUS

Features the most aggressive rasp cut for the fastest removal of hoof. The file side has a coarse cut for the most efficient finish work in dry or wet conditions.

BASSOLI 14" BLADE RASP

Features an aggressive rasp cut. The file side has chip breaker cuts that provides a smooth, clean finish to the hoof.

BASSOLI 50 RASP

The Bassoli 50 is 50 mm wide x 4 mm thick, making it very light and manageable. The file side is aggressive, but leaves a competition finish to the hoof.

BASSOLI 14" FARRIER RASP

Features one side file and one side rasp, suitable for both hoof and shoe.

SAVE EDGE ORIGINAL

Known for having a smooth yet aggressive cutting action. Superior tooth design and precision sharpening process.

SAVE EDGE 14" BEAST

Extra width, providing much more cutting surface. The Beast allows farriers to achieve a level hoof in fewer strokes.

SAVE EDGE 17" BEAST

Extra width, providing much more cutting surface. The extra length is perfect for large hooves like the draft horse. The Beast allows farriers to achieve a level hoof in fewer strokes.

HELLER eXcel LEGEND

Coarse side is designed to remove material easily with little effort. Its unique design makes this rasp versatile for a variety of climates and particularly effective in wet weather conditions. More teeth per row have been added to cover the entire rasp surface for greater efficiency and more effective leveling of the hoof.

HELLER BLACK LEGEND

Larger tooth angle, similar to the Heller Legend. Suitable for softer, damper horn structures. The Black Legend has an extra coating that ensures the material is released from the rasp more easily and makes it more wear resistant. Particularly good for horses that spend a lot of time outside where the hooves accumulate sand and mud.

HELLER eXcel ORIGINAL

Coarse side is designed to remove material easily with smaller-sized teeth that features an open structure to prevent clogging. Versatile for a variety of climates and hoof quality.

HELLER eXcel LEGEND (GREEN TANG)

10% wider and thinner than a regular rasp making it a very well balanced tool, and rasping more efficient. The rasp side has a concentrated pattern with over 650 teeth, to help prevent clogging. Particularly effective in wet or humid weather conditions. On the file side, Heller Multi Glide blades have very sharp edges and overlapping cut which leave a smooth glossy finish that requires no other finishing.

HELLER eXcel LEGEND (RED TANG)

Developed for hard and dry hooves. Small teeth with a more concentrated pattern for an efficient cut. File pattern creates efficient removal of hoof with little effort leaving a smooth surface.

HELLER BLACK MASTER RASP

Developed for hard, dry hooves with enhanced durability. Small teeth with a more concentrated pattern for an efficient cut. The Black Master receives a special surface treatment at the Heller factory to prolong the life of the rasp.
